columbine cares for seniors

NURSING CARE

Nursing care is provided by Registered Nurses (R.N.), Licensed Practical Nurses (L.P.N.), and Certified Nursing Assistants (C.N.A.). Skilled nursing care is provided, including medication administration, laboratory work, intravenous therapy, treatment of specific skin issues, tube feedings, and other medical conditions. Assistance in activities of daily living is provided, including bathing, dressing, mobility, and eating.

NURSE PRACTITIONER

A nurse practitioner is a registered nurse who has advanced education and clinical training in a health care specialty area. They work in collaboration with the resident's physician to treat medical issues.

RESTORATIVE NURSING

Our Restorative Nursing Program fills the niche between active therapy and normal assistance provided by nursing staff. Restorative Aides perform maintenance programs developed by licensed therapists and nurses including ambulation, range of motion, exercises, dressing, hygiene, hearing aid use, and restorative dining.

PHYSICAL THERAPY

Our Physical Therapy Program is directed by licensed physical therapists and may include gait, transfer and balance training, wheelchair positioning and mobility, therapeutic exercise, prosthetic and orthotic training, manual and soft tissue mobilization, modalities for pain control, patient and family education, and home assessments.

SPEECH/LANGUAGE PATHOLOGY

Our Speech/Language Pathologist is V-Stim trained and may provide assistance in eating skills, cognitive training, swallowing, expressive language, receptive language, speech, voice training, aural rehabilitation, alternative communication systems, and memory strategies training.

OCCUPATIONAL THERAPY

The Occupational Therapy Program is directed by registered occupational therapists. Assessment and training in activities of daily living including grooming, dressing, toileting, shower training, self feeding, upper extremity strengthening, fine motor skills training, hand splinting, safety awareness training, energy conservation and work simplification skills, home safety assessments, patient and family education and assistance with discharge planning.

SOCIAL SERVICES

Our social services staff advocate for residents. They coordinate individual care plan meetings and assist with psychosocial needs. Social services also completes the discharge planning process. This may include gathering information regarding needs in order to return home from our nurses, therapists, residents and family members.

ACTIVITIES

Activity programs include: arts and crafts, resident council, in-room activities, socials, and individualized activities. The activity staff makes every attempt to meet the individual interests of each resident. Volunteers are an important part of our activity program. They assist with activities as needed.

Many of the area churches are involved in providing services for the residents. Specific religious denominations are also represented on a regular basis.

Family and friends are invited and encouraged to attend activities.
